Tuladega, Ala.

Dear Sir

On the Night of Aug. the 3rd of this year I saw a strange object in the sky. I wrote about it but never mailed my letter. I have been unable to get it off my mind as I had never seen anything like it before and I wonder if I should or shouldn't report it to someone. So anyway I am writing again; whether it may be of any importance I don't know. I'll let you be the judge.

First let me say this, I have been reading about UFOs for about a year or over and I don't believe I ever read of anything being sighted like this. I enjoy reading about UFOs and every time I am out side at night I look at the sky to see if I can see anything myself. I don't say I believe every thing I read, I know lots of people lie about things for different reasons. But I do believe there are things going across our sky in all directions I have seen them. I have never seen anything real low or close. I read once that all the

#  
Satellites were put up to orbit from West to East. I have seen some satellites going in that direction. I have seen things that seemed like them only bigger and moving slower in drifting, floating motions going from North to South, not over head of me but when I've looked toward the East. Also in several directions at different times I have seen orange colored things moving across our skies.

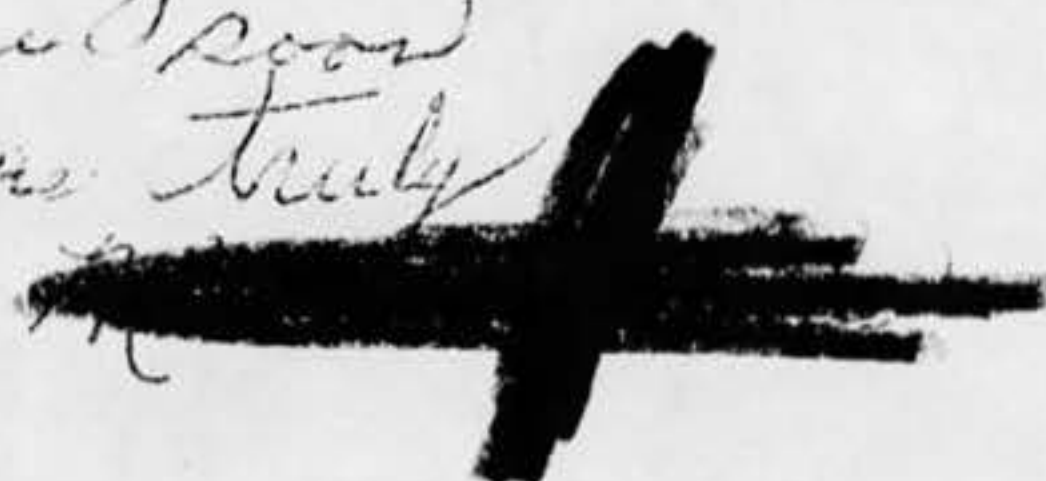

On the Night of Aug 3rd I was outside I heard an Air plane so I Watched it pass out of sight then an Air Way to the South of my home, that goes from West or N. West to S. East. I kept looking up at the stars and sky I was looking South when I saw this star like object coming it passed directly over head going North in a Matter of seconds. I hope I can explain to you just how it looked. It had no noise the only color or light it had was the shine of a star or satellite. The shine went on and off in short quick flashes as if it were saying beep-beep-beep-beep. it was a continuous flash on and off thing as it went out of sight. It was too fast for an Air plane, and for satellite. I have no idea how high to say it was but I don't believe it was as high

III  
as a satellite and no larger.

My Neighbor that live across the street from me were not at home at the time. They were visiting some friends here in town. They were sitting out side and they saw it too. They told me the next day. They were as amazed as I. They too agreed it could not have been an airplane.

I would like to know if <sup>you</sup> know what it was or if it is another unknown. If you should use this sighting in your books or reports please do not use my name.

Hope to hear from you soon

Yours truly  
Mrs. M. 

P.S.

Sept. 19. I looked around and didn't mail this when I first wrote it Aug 30. So I am going to mail it today like it is. so please excuse the mark through on the date.
